Our hospital-based skilled care program is a comprehensive inpatient program for patients recovering from an acute illness or surgery who no longer require acute hospital care but are not yet ready to go home.

Examples of skilled nursing care include intravenous injections and physical, occupational, speech, or respiratory therapy. If you qualify for coverage based on your need for skilled nursing care or rehabilitation, Medicare will cover all of your care needs in the facility, including assistance with activities of daily living.

Includes private room, meals, skilled nursing and rehabilitative services (physical therapy, speech therapy, occupational therapy and respiratory therapy) and other services and supplies.

TRADITIONAL MEDICARE ELIGIBILITY CRITERIA

- * Enrolled in Part A Medicare and has days available (up to 100 days in a benefit period)
- * Has had 3 consecutive day hospital inpatient stay in an acute care hospital within the last 30 days. (3 midnights)
- * Need for skilled care on a daily basis provided by or under the direct supervision of skilled nursing or rehabilitation professionals.
 - Nursing x 7 days/week and/or Physical Therapy x 5 or more days/week if that is the only skilled need.
- * Skilled needs are related to the condition which was treated or arose during the inpatient stay.

Contact Jessie McLelland, RN, Director of Case Management/Utilization Review about In Network options for Medicare advantage plans.

Hospital-Based Short Term Rehabilitation

- * Nursing care with 24-hour RN coverage.
- * 24-hour physician staffed emergency room.
- * Physical, occupational, speech and respiratory therapist 5-7 days a week based on your needs.
- * Daily physician visit.
- * On-site lab and radiology
- * Registered Dietician
